2024 Solar Eclipse Recap

Codroy –Lori and Emma Duke

We feel so privileged to have been a part of the "Codroy Convoy", where Nikolay led us to view our very first total solar eclipse! **It was so much fun** (despite the long hours of driving) to follow what felt like an elite team of professional eclipse chasers :)

It was **such a surreal and awe-inspiring day**, one that both Emma and I will never forget. She'll be 70 in 2079, so she has a chance to catch the next one in NL! I'm still in disbelief that we actually got to see it in all its glory. Thank you to the whole group for making us feel so welcome, especially Randy for organizing the eclipse glasses and member Zoom call, Nikolay for the ongoing expert weather advice and convoy logistics, and Robert, Craig and Randy for sharing awesome views through their scopes and binos during the big event.
